

Senate Resolution 1024

By: Senator Price of the 56th

A RESOLUTION

1 Recognizing plasma arc as a viable and effective renewable source for energy in Georgia;
2 and for other purposes.

3 WHEREAS, it is in the best interests of the citizens of Georgia to have access to the most
4 effective and efficient methods of waste management and energy production; and

5 WHEREAS, it is important to recognize that renewable forms and sources of energy can
6 supplement Georgia's existing natural resources; and

7 WHEREAS, technology is available to generate electric power from these renewable
8 sources; and

9 WHEREAS, this technology, commonly referred to as "plasma arc" technology, is a known
10 and viable instrument in the destruction of waste materials capable of producing renewable
11 energy; and

12 WHEREAS, plasma arc technology represents a significant and important application of a
13 renewable power supply for all Georgians; and

14 WHEREAS, the destruction of waste and power generation from renewable sources using
15 plasma arc is important to managed community development throughout this state.

16 NOW, THEREFORE, BE IT RESOLVED BY THE SENATE that plasma arc is a viable and
17 effective renewable source of energy in Georgia.
