

The Senate Judiciary Committee offered the following substitute to HB 416:

A BILL TO BE ENTITLED  
AN ACT

1 To amend Title 51 of the Official Code of Georgia Annotated, relating to torts, so as to  
2 change provisions relating to asbestos claims and silica claims; to provide for applicability;  
3 to provide definitions; to provide that physical impairment shall be an essential element of  
4 an asbestos claim or a silica claim; to provide for a limitations period for filing a claim; to  
5 provide for dismissal of pending claims under certain conditions; to provide for general rules  
6 applicable to new filings; to provide for forum non conveniens; to provide for venue; to  
7 provide for joinder and consolidation of claims; to provide for other matters relative to the  
8 foregoing; to provide for severability; to provide an effective date; to repeal conflicting laws;  
9 and for other purposes.

10 BE IT ENACTED BY THE GENERAL ASSEMBLY OF GEORGIA:

**SECTION 1.**

11 Title 51 of the Official Code of Georgia Annotated, relating to torts, is amended by inserting  
12 at the end thereof a new Chapter 14 to read as follows:  
13

"CHAPTER 14

14  
15 51-14-1.

16 This chapter applies to any claim defined in this chapter as an asbestos claim or as a silica  
17 claim.

18 51-14-2.

19 As used in this chapter, the term:

- 20 (1) 'Asbestos' means chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite  
21 asbestos, actinolite asbestos, and any of these minerals that have been chemically treated  
22 or altered, including but not limited to all minerals defined as asbestos in 29 CFR 1910,  
23 as amended from time to time.

1 (2) 'Asbestos claim' means any claim, wherever or whenever made, for damages, losses,  
2 indemnification, contribution, loss of consortium, or other relief arising out of, based on,  
3 or in any way related to the health effects of exposure to asbestos, including, but not  
4 limited to:

5 (A) Any claim for:

6 (i) Personal injury or death;

7 (ii) Mental or emotional injury;

8 (iii) Risk of disease or other injury; or

9 (iv) The costs of medical monitoring or surveillance, to the extent such claims are  
10 recognized under state law; and

11 (B) Any claim made by or on behalf of an exposed person or based on that exposed  
12 person's exposure to asbestos, including a representative, spouse, parent, child, or other  
13 relative of the exposed person.

14 For purposes of this chapter, 'asbestos claim' shall not mean a claim brought under a  
15 workers' compensation law administered by this state to provide benefits, funded by a  
16 responsible employer or its insurance carrier, for occupational diseases or injuries or for  
17 disability or death caused by occupational diseases or injuries.

18 (3) 'Asbestosis' means bilateral diffuse interstitial fibrosis of the lungs caused by  
19 inhalation of asbestos.

20 (4) 'Board certified internist' means a qualified physician licensed to practice medicine  
21 who has treated or is treating the exposed person or has or had a doctor-patient  
22 relationship with the exposed person and who is currently certified by the American  
23 Board of Internal Medicine.

24 (5) 'Board certified pathologist' means a qualified physician licensed to practice medicine  
25 who holds primary certification in anatomic pathology or combined anatomic or clinical  
26 pathology from the American Board of Pathology and whose professional practice is  
27 principally in the field of pathology and involves regular evaluation of pathology  
28 materials obtained from surgical or post-mortem specimens.

29 (6) 'Board certified pulmonologist' means a qualified physician licensed to practice  
30 medicine who has treated or is treating the exposed person or has or had a doctor-patient  
31 relationship with the exposed person and who is currently certified by the American  
32 Board of Internal Medicine in the subspecialty of pulmonary medicine.

33 (7) 'Certified B-reader' means a qualified physician who has successfully passed the  
34 B-reader certification examination for X-ray interpretation sponsored by the National  
35 Institute for Occupational Safety and Health and whose certification was current at the  
36 time of any readings required by this chapter.

1 (8) 'Chest X-rays' means films taken in two views (PA and Lateral) and graded quality 1  
2 for reading in accordance with the radiological standards established by the International  
3 Labor Office, as interpreted by a certified B-reader.

4 (9) 'Claimant' means a party seeking recovery of damages for an asbestos claim or silica  
5 claim, including the exposed person, any other plaintiff making a claim as a result of the  
6 exposed person's exposure to asbestos or silica, counterclaimant, cross-claimant, or  
7 third-party plaintiff. If a claim is brought through or on behalf of an estate, the term  
8 includes the claimant's decedent; if a claim is brought through or on behalf of a minor or  
9 incompetent, the term includes the claimant's parent or guardian.

10 (10) 'Exposed person' means any person whose exposure to asbestos or silica is the basis  
11 for an asbestos claim or a silica claim.

12 (11) 'FEV-1' means forced expiratory volume in the first second, which is the maximal  
13 volume of air expelled in one second during performance of simple spirometric tests.

14 (12) 'FVC' means forced vital capacity, which is the maximal volume of air expired with  
15 maximum effort from a position of full inspiration.

16 (13) 'ILO system' means the radiological ratings of the International Labor Office set  
17 forth in *Guidelines for the Use of ILO International Classification of Radiographs of*  
18 *Pneumoconioses*, revised edition, as amended from time to time by the International  
19 Labor Office.

20 (14) 'Lower limit of normal' means the fifth percentile of healthy populations based on  
21 age, height, and gender, as referenced in the American Medical Association's *Guides to*  
22 *the Evaluation of Permanent Impairment*, fifth edition, as amended from time to time by  
23 the American Medical Association.

24 (15) In the context of an asbestos claim, 'prima-facie evidence of physical impairment'  
25 means:

26 (A) That a board certified pathologist has made a diagnosis of pleural or peritoneal  
27 mesothelioma, or a diagnosis of cancer demonstrated by a medical report showing the  
28 diagnosis as a primary cancer, and has signed a report certifying to a reasonable degree  
29 of medical certainty that exposure to asbestos was a substantial contributing factor to  
30 the diagnosed cancer and that it was not more probably the result of causes other than  
31 the asbestos exposure revealed by the exposed person's employment and medical  
32 histories; or

33 (B) That a board certified internist, pulmonologist, or pathologist has signed a detailed  
34 narrative medical report and diagnosis stating that the exposed person suffers from a  
35 nonmalignant disease related to asbestos and that:

1 (i) Verifies that the doctor signing the detailed narrative medical report and diagnosis  
2 or a medical professional employed by and under the direct supervision and control  
3 of that doctor has taken:

4 (I) A detailed occupational and exposure history from the exposed person or, if that  
5 person is deceased, from the person most knowledgeable about the exposures that  
6 form the basis for the action. The history shall include all of the exposed person's  
7 principal employments and his or her exposures to airborne contaminants that can  
8 cause pulmonary impairment, including, but not limited to, asbestos, silica, and  
9 other disease-causing dusts, and the nature, duration, and level of any such  
10 exposure; and

11 (II) A detailed medical and smoking history that includes a thorough review of the  
12 exposed person's past and present medical problems and their most probable cause;

13 (ii) Sets out the details of the occupational, medical, and smoking histories and  
14 verifies that at least 15 years have elapsed between the exposed person's first  
15 exposure to asbestos and the time of diagnosis;

16 (iii) Verifies that the exposed person has:

17 (I) An ILO quality 1 chest X-ray taken in accordance with all applicable state and  
18 federal regulatory standards, and that the X-ray has been read by a certified  
19 B-reader according to the ILO system of classification as showing bilateral small  
20 irregular opacities (s, t, or u) graded 1/1 or higher or bilateral diffuse pleural  
21 thickening graded b2 or higher including blunting of the costophrenic angle;  
22 provided, however, that in a death case where no pathology is available, the  
23 necessary radiologic findings may be made with a quality 2 film if a quality 1 film  
24 is not available; or

25 (II) Pathological asbestosis graded 1(B) or higher under the criteria published in the  
26 *Asbestos-Associated Diseases, Special Issue of the Archives of Pathological and*  
27 *Laboratory Medicine*, Volume 106, Number 11, Appendix 3, as amended from time  
28 to time;

29 (iv) Verifies that the exposed person has pulmonary impairment related to asbestos  
30 as demonstrated by pulmonary function testing, performed using equipment, methods  
31 of calibration, and techniques that meet the criteria incorporated in the American  
32 Medical Association's *Guides to the Evaluation of Permanent Impairment*, fifth  
33 edition, and reported as set forth in 20 CFR 404, Subpt. P. App 1, Part (A) Section  
34 3.00 (E) and (F), as amended from time to time by the American Medical Association,  
35 and the interpretative standards of the American Thoracic Society, *Lung Function*  
36 *Testing: Selection of Reference Values and Interpretive Strategies*, 144 Am. Rev.

1 Resp. Dis. 1202-1218 (1991), as amended from time to time by the American  
2 Thoracic Society, that shows:

3 (I) Forced vital capacity below the lower limit of normal and FEV1/FVC ratio,  
4 using actual values, at or above the lower limit of normal; or

5 (II) Total lung capacity, by plethysmography or timed gas dilution, below the lower  
6 limit of normal; and

7 (v) Verifies that the doctor signing the detailed narrative medical report and diagnosis  
8 has concluded that exposure to asbestos was a substantial contributing factor to the  
9 exposed person's medical condition and physical impairment and that they were not  
10 more probably the result of other causes revealed by the exposed person's  
11 employment and medical histories.

12 Copies of the B-reading, the pulmonary function tests, including printouts of the flow  
13 volume loops and all other elements required to demonstrate compliance with the  
14 equipment, quality, interpretation, and reporting standards set forth herein, and the  
15 diagnosing physician's detailed narrative medical report and diagnosis shall be attached  
16 to any complaint alleging nonmalignant disease related to exposure to asbestos. All such  
17 reports, as well as all other evidence used to establish prima-facie evidence of physical  
18 impairment, must meet objective criteria for generally accepted medical standards related  
19 to exposure to asbestos and must not be obtained through testing or examinations that  
20 violate any applicable law, regulation, licensing requirement, or medical code of practice.  
21 Failure to attach the required reports or demonstration by any party that the reports do not  
22 satisfy the standards set forth herein shall result in the dismissal of the action, without  
23 prejudice, upon motion of any party.

24 (16) In the context of a silica claim, 'prima-facie evidence of physical impairment'  
25 means:

26 (A) A written diagnosis of silica related lung cancer demonstrated by:

27 (i) A medical report showing the diagnosis as a diagnosis of a primary lung cancer;  
28 and

29 (ii) A signed report certified by a board certified internist, pulmonologist, or  
30 pathologist stating to a reasonable degree of medical probability that exposure to  
31 silica was the cause of the diagnosed lung cancer with underlying silicosis  
32 demonstrated by bilateral nodular opacities (p, q, or r) occurring primarily in the  
33 upper lung fields, graded 1/1 or higher and not more probably the result of causes  
34 other than the silica exposure revealed by the exposed person's employment and  
35 medical histories;

36 (B) A written diagnosis of silica related progressive massive fibrosis or acute  
37 silicoproteinosis; or silicosis complicated by documented tuberculosis, demonstrated

1 by a signed report certified by a board certified internist, pulmonologist, or pathologist;  
2 or  
3 (C) That a board certified internist, pulmonologist, or pathologist has signed a detailed  
4 narrative medical report and diagnosis stating that the exposed person suffers from  
5 other stages of nonmalignant disease related to silicosis other than those set forth in  
6 subparagraphs (A) and (B) of this paragraph, and that:

- 7 (i) Verifies that the doctor signing the detailed narrative medical report and diagnosis  
8 or a medical professional employed by and under the direct supervision and control  
9 of that doctor has taken:
  - 10 (I) A detailed occupational and exposure history from the exposed person or, if that  
11 person is deceased, from the person most knowledgeable about the exposures that  
12 form the basis for the action. The history shall include all of the exposed person's  
13 principal employments and his or her exposures to airborne contaminants that can  
14 cause pulmonary impairment, including, but not limited to, asbestos, silica, and  
15 other disease-causing dusts, and the nature, duration, and level of any such  
16 exposure; and
  - 17 (II) A detailed medical and smoking history that includes a thorough review of the  
18 exposed person's past and present medical problems and their most probable cause;
- 19 (ii) Sets out the details of the occupational, medical, and smoking histories and  
20 verifies a sufficient latency period for the applicable stage of silicosis;
- 21 (iii) Verifies that the exposed person has at least Class 2 or higher impairment due  
22 to silicosis, as set forth in the American Medical Association's *Guides to the*  
23 *Evaluation of Permanent Impairment*, fifth edition, as amended from time to time;  
24 and
  - 25 (I) An ILO quality 1 chest X-ray taken in accordance with all applicable state and  
26 federal regulatory standards, and that the X-ray has been read by a certified  
27 B-reader according to the ILO system of classification as showing bilateral nodular  
28 opacities (p, q, or r) occurring primarily in the upper lung fields, graded 1/1 or  
29 higher; provided, however, that in a death case where no pathology is available, the  
30 necessary radiologic findings may be made with a quality 2 film if a quality 1 film  
31 is not available; or
  - 32 (II) Pathological demonstration of classic silicotic nodules exceeding 1 centimeter  
33 in diameter as set forth in *Archives of Pathological & Laboratory Medicine*, July,  
34 1988, as amended from time to time; and
- 35 (iv) Verifies that the doctor signing the detailed narrative medical report and  
36 diagnosis has concluded that the exposure to silica is a substantial contributing factor  
37 to the exposed person's medical condition and physical impairment and that they were

1 not more probably the result of other causes revealed by the exposed person's  
2 employment and medical history.

3 Copies of the B-reading, the pulmonary function tests, including printouts of the flow  
4 volume loops and all other elements required to demonstrate compliance with the  
5 equipment, quality, interpretation, and reporting standards set forth herein, and the  
6 diagnosing physician's detailed narrative medical report and diagnosis shall be attached  
7 to any complaint alleging nonmalignant disease related to exposure to silicosis. All such  
8 reports, as well as all other evidence used to establish prima-facie evidence of physical  
9 impairment, must meet objective criteria for generally accepted medical standards related  
10 to exposure to silica and must not be obtained through testing or examinations that violate  
11 any applicable law, regulation, licensing requirement, or medical code of practice. Failure  
12 to attach the required reports or demonstration by any party that the reports do not satisfy  
13 the standards set forth herein shall result in the dismissal of the action, without prejudice,  
14 upon motion of any party.

15 (17) 'Qualified physician' means a medical doctor, who:

16 (A) Spends no more than 10 percent of his or her professional practice time in  
17 providing consulting or expert services in connection with actual or potential civil  
18 actions, and whose medical group, professional corporation, clinic, or other affiliated  
19 group earns not more than 20 percent of its revenues from providing such services;

20 (B) Receives or received payment for the treatment of the exposed person from that  
21 person or from that person's health maintenance organization or other medical provider;  
22 and

23 (C) Does not require as a condition of diagnosing, examining, testing, screening, or  
24 treating the exposed person that legal services be retained by the exposed person or any  
25 other person pursuing an asbestos or silica claim based on the exposed person's  
26 exposure to asbestos or silica.

27 (18) 'Silica' means a group of naturally occurring crystalline forms of silicon dioxide,  
28 including, but not limited to, quartz and silica sand, whether in the form of respirable free  
29 silica or any quartz-containing or crystalline silica-containing dust, in the form of a  
30 quartz-containing by-product or crystalline silica-containing by-product, or dust released  
31 from individual or commercial use, release, or disturbance of silica sand, silicon dioxide,  
32 or crystalline-silica containing media, consumables, or materials.

33 (19) 'Silica claim' means any claim, wherever or whenever made, for damages, losses,  
34 indemnification, contribution, loss of consortium, or other relief arising out of, based on,  
35 or in any way related to the health effects of exposure to silica, including, but not limited  
36 to:

37 (A) Any claim for:

- 1 (i) Personal injury or death;  
2 (ii) Mental or emotional injury;  
3 (iii) Risk of disease or other injury; or  
4 (iv) The costs of medical monitoring or surveillance, to the extent such claims are  
5 recognized under state law; and

6 (B) Any claim made by or on behalf of any exposed person or based on that exposed  
7 person's exposure to silica, including a representative, spouse, parent, child, or other  
8 relative of the exposed person.

9 For purposes of this chapter, 'silica claim' shall not mean a claim brought under a  
10 workers' compensation law administered by this state to provide benefits, funded by a  
11 responsible employer or its insurance carrier, for occupational diseases or injuries or for  
12 disability or death caused by occupational diseases or injuries.

13 (20) 'Silicosis' means nodular interstitial fibrosis of the lung produced by inhalation of  
14 silica.

15 (21) 'Total lung capacity' means the volume of gas contained in the lungs at the end of  
16 a maximal inspiration.

17 51-14-3.

18 (a) Prima-facie evidence of physical impairment of the exposed person as defined in  
19 paragraph (15) or (16) of Code Section 51-14-2 shall be an essential element of an asbestos  
20 claim or silica claim.

21 (b) No person shall bring or maintain a civil action alleging an asbestos claim or silica  
22 claim in the absence of prima-facie evidence of physical impairment resulting from a  
23 medical condition for which exposure to asbestos or silica was a substantial contributing  
24 factor.

25 51-14-4.

26 Notwithstanding any other provision of law, with respect to any asbestos claim or silica  
27 claim not barred as of the effective date of this chapter, the limitations period shall not  
28 begin to run until the exposed person or any plaintiff making an asbestos claim or silica  
29 claim based on the exposed person's exposure to asbestos or silica discovers, or through  
30 the exercise of reasonable diligence should have discovered, that the exposed person is or  
31 was physically impaired as defined in paragraph (15) or (16) of Code Section 51-14-2.

1 51-14-5.

2 (a) Any asbestos claim or silica claim pending in this state on the effective date of this  
3 chapter shall be dismissed within 180 days of the effective date of this chapter without  
4 prejudice unless:

5 (1) All parties stipulate by no less than 60 days prior to the commencement of trial that  
6 the plaintiff has established prima-facie evidence of physical impairment with respect to  
7 an asbestos claim or silica claim; or

8 (2) The trial court in which the complaint was initially filed issues an order that the  
9 plaintiff has established prima-facie evidence of physical impairment with respect to an  
10 asbestos claim or silica claim. Such an order shall be issued only if the following  
11 conditions and procedures are met:

12 (A) By no less than 60 days prior to the commencement of trial, the plaintiff files with  
13 the trial court and serves on each defendant named in the complaint or on counsel  
14 designated by each defendant the medical documentation necessary to establish  
15 prima-facie evidence of physical impairment;

16 (B) Within 30 days of service of plaintiff's documentation establishing prima-facie  
17 evidence of physical impairment, any defendant may file an opposition with the trial  
18 court challenging plaintiff's prima-facie evidence of physical impairment. To the extent  
19 any such opposition is based upon the medical opinion of a licensed physician, that  
20 physician shall be a qualified physician, as that term is defined in subparagraph (A) of  
21 paragraph (17) of Code Section 51-14-2, and shall be either a board certified internist,  
22 a board certified pathologist, a board certified pulmonologist, or a certified B-reader.  
23 Defendant's opposition shall be filed with the trial court and served on plaintiff's  
24 counsel and each defendant;

25 (C) If a defendant does not file an opposition within the time permitted, the trial court  
26 shall determine if the plaintiff has established prima-facie evidence of physical  
27 impairment in a timely manner based on the papers and documentation submitted to the  
28 trial court;

29 (D) If a defendant files an objection, then within ten days of service of defendant's  
30 opposition, the plaintiff may file a reply with the trial court. The reply must be served  
31 on each defendant; and

32 (E) The trial court shall determine if the plaintiff has established prima-facie evidence  
33 of physical impairment in a timely manner based on the papers and documentation  
34 submitted to the trial court. A hearing will be conducted only if the trial court so orders  
35 on its own motion, or if, in the exercise of discretion, the trial court grants a party's  
36 request for a hearing. No testimony shall be taken at the hearing. A decision of the trial  
37 court not to grant a request for a hearing may not be appealed and does not constitute

1 reversible error. If the trial court determines that the plaintiff has failed to establish  
2 prima-facie evidence of physical impairment, it shall dismiss the plaintiff's complaint  
3 without prejudice; or

4 (3) In the event a trial is scheduled to commence in less than 60 days from the effective  
5 date of this chapter, a trial court can shorten the deadlines contained in this subsection as  
6 necessary in order to make a determination regarding the prima-facie evidence of  
7 physical impairment before trial commences.

8 (b)(1) The plaintiff in any asbestos claim or silica claim filed in this state on or after the  
9 effective date of this chapter shall file together with the complaint a medical affidavit and  
10 accompanying documentation setting forth the medical findings necessary to establish  
11 prima-facie evidence of physical impairment as provided in paragraph (15) or (16) of  
12 Code Section 15-14-2. In addition, the plaintiff's complaint shall allege with specificity  
13 that the plaintiff satisfies the prima-facie evidence of physical impairment with respect  
14 to an asbestos claim or silica claim.

15 (2) Within 90 days of service of plaintiff's complaint, any defendant may file an  
16 opposition with the trial court challenging plaintiff's prima-facie evidence of physical  
17 impairment. To the extent any such opposition is based upon the medical opinion of a  
18 licensed physician, that physician shall be a qualified physician, as that term is defined  
19 in subparagraph (A) of paragraph (17) of Code Section 51-14-2, and shall be either a  
20 board certified internist, a board certified pathologist, a board certified pulmonologist, or  
21 a certified B-reader. Defendant's opposition shall be filed with the trial court and served  
22 on plaintiff's counsel and each defendant.

23 (3) If the defendant does not file an opposition challenging plaintiff's prima-facie  
24 evidence of physical impairment within the time permitted, the trial court shall determine  
25 if the plaintiff has established prima-facie evidence of physical impairment based on the  
26 papers and documentation submitted to the trial court. The trial court's decision shall be  
27 made in a timely manner.

28 (4) If the defendant files an objection, the plaintiff may file a reply with the trial court  
29 within ten days of service of defendant's opposition. The reply must be served on each  
30 defendant.

31 (5) The trial court shall determine if the plaintiff has established prima-facie evidence  
32 of physical impairment with respect to an asbestos claim or silica claim in a timely  
33 manner based on the papers and documentation submitted to the trial court. A hearing  
34 will be conducted only if the trial court so orders on its own motion, or if, in the exercise  
35 of discretion, the trial court grants a party's request for a hearing. No testimony shall be  
36 taken at the hearing. A decision of the trial court not to grant a request for a hearing may  
37 not be appealed and does not constitute reversible error. If the trial court determines that

1 the plaintiff has failed to establish prima-facie evidence of physical impairment, it shall  
2 dismiss the plaintiff's complaint without prejudice.

3 51-14-6.

4 (a) All asbestos claims and silica claims filed in this state on or after the effective date of  
5 this chapter shall include a sworn information form containing the following information:

6 (1) The exposed person's name, address, date of birth, social security number, and  
7 marital status;

8 (2) If the exposed person alleges exposure to asbestos or silica through the testimony of  
9 another person or other than by direct or bystander exposure to a product or products, the  
10 name, address, date of birth, social security number, and marital status for each person  
11 by which claimant alleges exposure, hereafter the 'index person,' and the claimant's  
12 relationship to each person;

13 (3) The specific location of each alleged exposure;

14 (4) The specific asbestos-containing product or silica-containing product to which the  
15 exposed person was exposed and the manufacturer of each product;

16 (5) The beginning and ending dates of each alleged exposure as to each  
17 asbestos-containing product or silica-containing product for each location at which  
18 exposure allegedly took place for plaintiff and for each index person;

19 (6) The occupation and name of employer of the exposed person at the time of each  
20 alleged exposure;

21 (7) The specific condition related to asbestos or silica claimed to exist; and

22 (8) Any supporting documentation of the condition claimed to exist.

23 (b) All asbestos claims and silica claims along with sworn information forms must be  
24 individually filed in separate civil actions except that claims relating to the exposure to  
25 asbestos or silica for the same exposed person whose alleged injury is the basis for the civil  
26 action may be joined in a single action. Otherwise, no claims on behalf of a group or class  
27 of persons shall be joined in single civil action.

28 51-14-7.

29 (a) Until such time as the trial court enters an order determining that the plaintiff has  
30 established prima-facie evidence of physical impairment, no asbestos claim or silica claim  
31 shall be subject to discovery, except discovery related to establishing or challenging the  
32 prima-facie evidence of physical impairment or by order of the trial court upon motion of  
33 one of the parties and for good cause shown.

34 (b) The medical criteria set forth in this chapter to establish prima-facie evidence of  
35 physical impairment are solely for the purpose of determining whether a claim meets the

1 criteria to proceed in court. The fact that a plaintiff satisfies the criteria necessary to  
2 establish prima-facie evidence of physical impairment for an asbestos claim or silica claim  
3 shall not be construed as an admission or determination that the exposed person in fact has  
4 a condition related to exposure to asbestos or silica and shall not be cited, referred to, or  
5 otherwise used at trial.

6 (c) Unless stipulated to by the parties, an expert report submitted for the purpose of  
7 establishing or challenging prima-facie evidence of physical impairment is inadmissible  
8 for any other purpose.

9 51-14-8.

10 (a) Notwithstanding Code Section 1-2-6 or 1-2-10, a civil action alleging an asbestos claim  
11 or silica claim may only be brought or maintained in the courts of Georgia if the plaintiff,  
12 whether a citizen of Georgia or a citizen of some other state, is a resident of Georgia at the  
13 time of filing the action or the exposure to asbestos or silica on which the claim is based  
14 occurred in Georgia; provided, however, nothing contained in this chapter shall preclude  
15 a nonresident of Georgia who currently has a case pending in this state on the effective date  
16 of this chapter from maintaining an asbestos claim or silica claim if that nonresident can  
17 establish prima-facie evidence of physical impairment with respect to an asbestos claim or  
18 silica claim as provided in paragraph (15) or (16) of Code Section 51-14-2.

19 (b) The trial court, on motion of a defendant, shall dismiss each asbestos claim or silica  
20 claim that is subject to this chapter against the defendant unless the plaintiff files a written  
21 statement with the trial court electing to abate the plaintiff's claim against the defendant  
22 for a period of 180 days from the date the trial court disposes of the defendant's motions  
23 in order to afford the plaintiff an opportunity to file a new action on the claims in another  
24 state of the United States.

25 (c)(1) A trial court may not abate or dismiss a claim under this Code section until the  
26 defendant files with the trial court or with the clerk of the court a written stipulation that,  
27 with respect to a new action on the claim commenced by the plaintiff, the defendant  
28 waives the right to assert a statute of limitations defense in all other states of the United  
29 States in which the claim was not barred by limitations at the time the claim was filed in  
30 this state as necessary to effect a tolling of the limitations periods in those states  
31 beginning on the date the claim was filed in this state and ending on the date the claim  
32 is dismissed or the period of abatement ends. The fact that a claim subject to this Code  
33 section was barred by the statute of limitations in all other states of the United States at  
34 the time it was filed in this state shall not prevent the claim from being dismissed  
35 pursuant to this Code section and such claim shall be dismissed even if it can not be filed  
36 in another state. The trial court may not abate or dismiss a claim under this Code section

1 until the defendant files with the trial court or with the clerk of the court a written  
2 stipulation that, with respect to a new action on the claim commenced by the plaintiff in  
3 another state of the United States, the plaintiff may elect that the plaintiff and the  
4 defendant may rely on responses to discovery already provided under the Georgia Civil  
5 Practice Act, plus any additional discovery that may be conducted under the rules of civil  
6 procedure in another state, or use responses to discovery already provided and conduct  
7 additional discovery as permitted under the rules of civil procedure in such other state.

8 (2) If less than all of the defendants agree to provide the stipulations set forth in  
9 paragraph (1) of this subsection, then the court shall dismiss the claims of those  
10 defendants who so stipulate.

11 (d) To comply with this Code section in relation to an action that involves both claims that  
12 arose in this state and claims that arose outside this state, a trial court shall consider each  
13 claim individually and shall sever from the action the claims that are subject to this Code  
14 section.

15 (e) If a plaintiff alleges that the exposed person was exposed to asbestos or silica while  
16 located in more than one jurisdiction, the trial court shall determine, for purposes of this  
17 Code section, which of the jurisdictions is the most appropriate forum for the claim,  
18 considering the relative amounts and lengths of the exposed person's exposure to asbestos  
19 or silica in each jurisdiction.

20 51-14-9.

21 Notwithstanding any other provision of law, an asbestos claim or silica claim that meets  
22 the requirements of this chapter permitting a claim to be filed in this state may only be filed  
23 in the county where the plaintiff resides or the county in which the exposure to asbestos or  
24 silica on which the claim is based occurred and that exposure was a substantial contributing  
25 factor to the physical impairment of the exposed person on which the plaintiff's claim is  
26 based. If a plaintiff alleges that an exposed person was exposed to asbestos or silica while  
27 located in more than one county, the trial court shall determine which of the counties is the  
28 most appropriate forum for the claim, considering the relative amounts and lengths of the  
29 exposed person's exposure to asbestos or silica in each of those counties.

30 51-14-10.

31 A trial court may consolidate for trial any number and type of asbestos claims or silica  
32 claims with the consent of all the parties. In the absence of such consent, the trial court may  
33 consolidate for trial only asbestos claims or silica claims relating to the same exposed  
34 person and members of his or her household."

**SECTION 2.**

1  
2 In the event any section, subsection, sentence, clause, or phrase of this Act shall be declared  
3 or adjudged invalid or unconstitutional, such adjudication shall in no manner affect the other  
4 sections, subsections, sentences, clauses, or phrases of this Act, which shall remain of full  
5 force and effect as if the section, subsection, sentence, clause, or phrase so declared or  
6 adjudged invalid or unconstitutional were not originally a part hereof. The General  
7 Assembly declares that it would have passed the remaining parts of this Act if it had known  
8 that such part or parts hereof would be declared or adjudged invalid or unconstitutional.

**SECTION 3.**

9  
10 This Act shall become effective upon its approval by the Governor or upon its becoming law  
11 without such approval and applies to all asbestos claims or silica claims filed on or after the  
12 effective date and to any pending asbestos claims or silica claims in which trial has not  
13 commenced as of the effective date.

**SECTION 4.**

14  
15 All laws and parts of laws in conflict with this Act are repealed.
