

Senate Resolution 499

By: Senator Tolleson of the 20th

**ADOPTED SENATE**

**A RESOLUTION**

1 Creating the Senate Coastal Georgia Sound Science Initiative Study Committee; and for  
2 other purposes.

3 WHEREAS, rapid population growth in coastal Georgia, increased tourism, and sustained  
4 industrial activity have adversely affected coastal Georgia's water resources and limited the  
5 available water supply; and

6 WHEREAS, the main source of water supply in the coastal area is the Upper Floridan  
7 aquifer, an extremely productive water source which was first developed in the late 1800's  
8 and has been used extensively in the area ever since; and

9 WHEREAS, water withdrawals from the aquifer have resulted in several problems,  
10 including: substantial water-level declines; migration of seawater into the aquifer at the  
11 northern end of Hilton Head Island, South Carolina; contamination of the aquifer from  
12 underlying brine-filled strata at Brunswick, Georgia; and decreased ground-water inflow to  
13 springs, freshwater ponds, marshes, and wetlands, which could affect the balance of  
14 freshwater and saltwater in tidal rivers and estuaries; and

15 WHEREAS, saltwater contamination has constrained further development of the Upper  
16 Floridan aquifer in coastal Georgia and created fierce competing demands for the limited  
17 fresh water supply; and

18 WHEREAS, the Environmental Protection Division of the Department of Natural Resources  
19 (EPD) released an interim strategy in April, 1997, to manage saltwater intrusion in the Upper  
20 Floridan aquifer; and, as part of this interim plan, EPD capped permitted withdrawal from  
21 the Upper Floridan aquifer at 1997 rates in the Savannah and Brunswick areas; and

1 WHEREAS, the EPD has funded a program of scientific and feasibility studies, known as  
2 the Georgia Coastal Sound Science Initiative, to support development of a related final  
3 water-management strategy;

4 WHEREAS, the current status of the initiative is as follows: all field studies of the initiative  
5 have been completed; approximately 41 peer-reviewed scientific reports have been published  
6 to date; a comprehensive ground-water and surface-water monitoring network has been  
7 established in Georgia; ground-water modeling capable of indicating where and when  
8 saltwater intrusion will occur is in development and initial results will be available in the  
9 spring of 2005; the cost-effectiveness of various methods of stopping saltwater intrusion  
10 needs further study; a first draft of a final strategy and public hearings are scheduled for the  
11 summer of 2005; and a revised draft of a final strategy is due in December, 2005; and

12 WHEREAS, it is imperative to review the results of the initiative, especially with regard to  
13 what, if any, legislation may be warranted thereby.

14 NOW, THEREFORE, BE IT RESOLVED BY THE SENATE that there is created the Senate  
15 Coastal Georgia Sound Science Initiative Study Committee to be composed of five members  
16 of the Senate to be appointed by the Senate Committee on Assignments. The Senate  
17 Committee on Assignments shall designate a member of the committee as chairperson of the  
18 committee. The chairperson shall call all meetings of the committee.

19 BE IT FURTHER RESOLVED that the committee shall undertake a study of the conditions,  
20 needs, issues, and problems mentioned above or related thereto and recommend any action  
21 or legislation which the committee deems necessary or appropriate. The committee may  
22 conduct such meetings at such places and at such times as it may deem necessary or  
23 convenient to enable it to exercise fully and effectively its powers, perform its duties, and  
24 accomplish the objectives and purposes of this resolution. The members of the committee  
25 shall receive the allowances provided for in Code Section 28-1-8 of the Official Code of  
26 Georgia Annotated. The allowances authorized by this resolution shall not be received by  
27 any member of the committee for more than five days unless additional days are authorized.  
28 The funds necessary to carry out the provisions of this resolution shall come from the funds  
29 appropriated to the Senate. In the event the committee makes a report of its findings and  
30 recommendations, with suggestions for proposed legislation, if any, such report shall be  
31 made on or before December 1, 2005. The committee shall stand abolished on December  
32 1, 2005.
