

The Senate Health and Human Services Committee offered the following substitute to SB 422:

A BILL TO BE ENTITLED
AN ACT

1 To amend Chapter 9 of Title 43 of the Official Code of Georgia Annotated, relating to
2 chiropractors, so as to provide definitions; to provide for the scope of practice; to increase
3 the penalty for improper practice; to provide for related matters; to repeal conflicting laws;
4 and for other purposes.

5 BE IT ENACTED BY THE GENERAL ASSEMBLY OF GEORGIA:

SECTION 1.

6 Chapter 9 of Title 43 of the Official Code of Georgia Annotated, relating to chiropractors,
7 is amended by striking Code Section 43-9-1, relating to definitions, and inserting in lieu
8 thereof a new Code Section 43-9-1 to read as follows:
9

10 "43-9-1.

11 As used in this chapter, the term:

12 (1) 'Board' means the Georgia Board of Chiropractic Examiners.

13 (2) 'Chiropractic' means the adjustment of the ~~articulation~~ articulations of the human
14 body, including ilium, sacrum, and coccyx, and the use of ~~electric X-ray photography~~,
15 provided that ~~the~~ X-ray shall not be used for therapeutical purposes. The term
16 '~~chiropractic~~' shall also mean that separate and distinct branch of the healing arts whose
17 science and art utilize the inherent recuperative powers of the body and the relationship
18 between the musculoskeletal structures and functions of the body, articularly of the spinal
19 column and the nervous system, in the restoration and maintenance of health.
20 Chiropractic is a learned profession which teaches that the relationship between structure
21 and function in the human body is a significant health factor and that such relationships
22 between the spinal column and the nervous system are most significant, since the normal
23 transmission and expression of nerve energy are essential to the restoration and
24 maintenance of health. However, the term '~~chiropractic~~' shall not include the use of drugs
25 or surgery. The adjustment referred to in this paragraph and subsection (b) of Code

1 Section 43-9-16 may only be administered by a doctor of chiropractic authorized to do
 2 so by the provisions of this chapter; provided, however, that the provisions of this Code
 3 section shall not prevent any other health care provider from administering techniques
 4 authorized within their scope of practice.

5 (3) 'Health certificate' means a certification of physical examination in sickness, health,
 6 or disability including reports for absence from employment or school or from
 7 participation in sports activities.

8 (4) 'Practice of chiropractic' or 'to practice chiropractic' shall also include the procedure
 9 by which chiropractors licensed in the State of Georgia evaluate the quality and
 10 efficiency of services ordered or performed by other chiropractors, including, but not
 11 limited to, practice analysis, audit, claims review, underwriting assistance, utilization
 12 review, and compliance with applicable laws, rules, and regulations.

13 (5) 'Subluxation' means a complex of functional or pathological articular changes that
 14 may compromise neutral integrity and may influence organ system function and general
 15 health. A subluxation is evaluated, diagnosed, and managed through the use of
 16 chiropractic procedures based on the best available rational and empirical evidence."

17 SECTION 2.

18 Said chapter is further amended by striking Code Section 43-9-16, relating to scope of
 19 practice, and inserting in lieu thereof a new Code Section 43-9-16 to read as follows:

20 "43-9-16.

21 (a) Chiropractors who have complied with this chapter shall have the right to practice
 22 chiropractic as defined in ~~paragraph (2)~~ paragraphs (2) and (4) of Code Section 43-9-1 and
 23 to evaluate, diagnose, and adjust patients according to specific chiropractic methods in
 24 order to correct spinal subluxations or to adjust the articulations of the human body.
 25 Chiropractors shall observe all applicable public health regulations.

26 (b) The chiropractic adjustment of the spine or articulations of the human body may
 27 include manual adjustments and adjustments by means of electrical and mechanical devices
 28 which produce traction or vibration. Chiropractors who have complied with this chapter
 29 may also use ~~in conjunction with adjustments of the spinal structures electrical therapeutic~~
 30 physical modalities. Modalities include any physical agent applied to produce therapeutic
 31 change to biologic tissues including thermal, acoustic, light, mechanical, or electric energy;
 32 which induce heat or electrical current beneath the skin, including therapeutic hot or cold
 33 packs; ultrasound; galvanism; microwave; diathermy; and electromuscular electrical
 34 stimulation. Chiropractors who have complied with this chapter may utilize and
 35 recommend ~~hot and cold packs and nonprescription, over-the-counter structural supports~~
 36 for the therapeutic procedures effecting change through the application of clinical skills or

1 services that attempt to improve function, including therapeutic exercise, therapeutic
2 activities, manual therapy techniques, massage, and structural supports, as they relate to the
3 articulations of the human body ~~which are commonly available through retail pharmacy~~
4 ~~outlets~~; provided, however, that the same shall not be construed to allow chiropractors to
5 treat patients outside the scope of practice of chiropractic as set forth in this chapter.

6 (c) Chiropractors who have complied with this chapter may utilize those ~~electric~~
7 therapeutic physical modalities and procedures described in subsection (b) of this Code
8 section, provided that the chiropractor shall have completed a course of study containing
9 a minimum of 120 hours of instruction in the proper utilization of those procedures in
10 accordance with the guidelines set forth by the Council on Chiropractic Education or its
11 successor and is qualified and so certified in that proper utilization.

12 (d) Chiropractors who have complied with this chapter shall have the right to sign health
13 certificates, reporting to the proper health officers the same as other practitioners.

14 (e) Chiropractors who have complied with this chapter may use X-ray and refer for
15 diagnostic imaging, neurodiagnostic studies, and laboratory tests; provided, however, that
16 such referral shall not be construed to allow such chiropractor to order, conduct, or perform
17 such tests and the referral shall be to an entity with whom the chiropractor has no direct or
18 indirect pecuniary interest.

19 ~~(e)~~(f) Chiropractors shall not prescribe or administer medicine to patients, perform
20 surgery, or practice obstetrics or osteopathy.

21 ~~(f)~~(g) Chiropractors shall not use venipuncture, capillary puncture, acupuncture, or any
22 other technique which is invasive of the human body either by penetrating the skin or
23 through any of the orifices of the body or through the use of colonics; provided, however,
24 that this shall not prohibit the chiropractor from examining the ears or mouth to determine
25 the appropriateness of chiropractic care. Nothing in this subsection shall be construed to
26 prohibit a chiropractor who is licensed to perform acupuncture under Article 3 of Chapter
27 34 of this title from engaging in the practice of acupuncture.

28 ~~(g)~~(h) A person professing to practice chiropractic for compensation must bring to the
29 exercise of that person's profession a reasonable degree of care and skill. Any injury
30 resulting from a want of such care and skill shall be a tort for which a recovery may be had.
31 If a chiropractor performs upon a patient any act authorized to be so performed under this
32 chapter but which act also constitutes a standard procedure of the practice of medicine,
33 including but not limited to the use of modalities such as those described in subsection (b)
34 of this Code section and X-rays, under similar circumstances the chiropractor shall be held
35 to the same standard of care as would licensed doctors of medicine who are qualified to and
36 who actually perform those acts under similar conditions and like circumstances.
