

House Resolution 15

By: Representatives Channell of the 116th, Parrish of the 156th, Royal of the 171st, Stephens of the 164th, and Sheldon of the 105th

A RESOLUTION

- 1 Creating the Joint Study Committee on State Stroke System of Care; and for other purposes.
- 2 WHEREAS, approximately 700,000 Americans have a new or recurrent stroke each year,
3 and stroke remains the third leading cause of death in the United States when considered
4 independently from other cardiovascular diseases; and
- 5 WHEREAS, stroke continues to be a significant cause of morbidity and mortality in the
6 United States; and
- 7 WHEREAS, stroke also remains a leading cause of serious, long-term disability in the United
8 States, and major advances have been made during the past several decades in stroke
9 prevention, treatment, and rehabilitation; and
- 10 WHEREAS, on average, someone dies of a stroke every three minutes; and
- 11 WHEREAS, stroke leads to the death of more than 4,200 citizens of the State of Georgia
12 each year; and
- 13 WHEREAS, the majority of Americans are not aware of their stroke risk factors, nor are they
14 aware of the signs and symptoms of an impending stroke; and
- 15 WHEREAS, despite successes in delivering effective new therapies, significant obstacles
16 remain in ensuring that scientific advances are consistently translated into clinical practice;
17 and
- 18 WHEREAS, in many instances, these obstacles are related to a fragmentation of stroke
19 related care caused by an inadequate integration system between the various facilities,
20 agencies, and professionals that should closely collaborate in providing stroke care; and

1 WHEREAS, there is increased emphasis on improving the components of stroke care,
2 including recommendations from the Brain Attack Coalition for primary stroke centers and
3 a formal process provided through the Joint Commission on Accreditation of Healthcare
4 Organizations (JCAHO) for the certification of primary stroke centers; and

5 WHEREAS, it is critically important to look carefully at how the distinct components can
6 be better integrated into systems of stroke care; and

7 WHEREAS, the fragmented approach to stroke care that exists in most regions of the United
8 States fails to provide an effective integrated system for stroke prevention, treatment, and
9 rehabilitation because of inadequate linkages and coordination among the fundamental
10 components of stroke care; and

11 WHEREAS, although individual components of a system of stroke care may be well
12 developed, these components often operate in isolation; and

13 WHEREAS, the problem of access to coordinated stroke care may be exacerbated in rural
14 or other areas where there is inadequate access to neurological expertise; and

15 WHEREAS, a system of stroke care should coordinate and promote patient access to the full
16 range of activities and services associated with stroke prevention, treatment, and
17 rehabilitation, including the following key components: primordial and primary prevention,
18 community education, notification and response of emergency medical services, acute stroke
19 treatment, including the hyperacute and emergency department phases, subacute stroke
20 treatment and secondary prevention, rehabilitation, and continuous quality improvement
21 (CQI) activities.

22 NOW, THEREFORE, BE IT RESOLVED BY THE GENERAL ASSEMBLY OF
23 GEORGIA that there is created the Joint Study Committee on State Stroke System of Care
24 to be composed of five members of the House of Representatives to be appointed by the
25 Speaker of the House of Representatives and five members of the Senate to be appointed by
26 the Lieutenant Governor. The Speaker of the House of Representatives shall designate a
27 member of the House and the Lieutenant Governor shall designate a member of the Senate
28 who shall serve as cochairpersons of the committee. The committee shall meet at the call of
29 the cochairpersons in conjunction with the Georgia American Stroke Association, a division
30 of the American Heart Association.

1 BE IT FURTHER RESOLVED that the committee shall undertake a study of the system of
2 stroke care in Georgia in regards to primary prevention, notification/response of EMS, acute
3 treatment of stroke, subacute treatment of stroke, rehabilitation of stroke patients, and the
4 disparities in recognition of, as well as treatment in, minority communities. The committee
5 shall hear from experts and key leaders from these areas and recommend any actions or
6 legislation which the committee deems necessary or appropriate. The committee may
7 conduct such meetings at such places and at such times as it may deem necessary or
8 convenient to enable it to exercise fully and effectively its powers, perform its duties, and
9 accomplish the objectives and purposes of this resolution. The members of the committee
10 shall receive the allowances authorized for legislative members of interim legislative
11 committees but shall receive the same for not more than five days unless additional days are
12 authorized. The funds necessary to carry out the provisions of this resolution shall come
13 from the funds appropriated to the House of Representatives and Senate. In the event the
14 committee makes a report of its findings and recommendations with suggestions for proposed
15 legislation, if any, such report shall be made on or before December 31, 2007. The
16 committee shall stand abolished on December 31, 2007.
