 68 diabetes; and grants may also be awarded to address evidence based activities that focus
 69 on policy, systems, and environmental changes that support prevention, early detection,
 70 and treatment of diabetes. Eligible entities shall include community and faith based
 71 clinics and other organizations, federally qualified health centers, regional and county
 72 health departments, hospitals, and other public entities, and other health related service
 73 providers which are qualified as exempt from taxation under the provisions of Section
