Senate Resolution 188
By: Senators Unterman of the 45th, Burke of the 11th, Kirk of the 13th and Orrock of the 36th

ADOPTED SENATE

A RESOLUTION

Creating the Senate Study Committee on Barriers to Georgians' Access to Adequate Healthcare; and for other purposes.

WHEREAS, Georgia falls below national averages in rankings of state population health, with higher than average death rates from diabetes, heart disease, and HIV; and

WHEREAS, Georgia has the highest rate of pregnancy related maternal deaths in the nation, and higher than average infant death rates; and

WHEREAS, Georgia has a significant percent of primary health care needs and mental health care needs that are currently unmet; and

WHEREAS, advanced practice registered nurses (APRNs) have acquired, through graduate-level education, advanced clinical knowledge and skills to provide direct patient care; and

WHEREAS, Georgia laws and regulations have not kept pace with advanced practice nursing's evolution over the past 40 years, compromising Georgians' access to care; and

WHEREAS, Georgia is one of only 12 states with laws restricting the autonomy of APRNs; and

WHEREAS, 21 other states have adopted full practice authority for APRNs, and removed requirements for physician supervision, without any evidence of patient harm; and

WHEREAS, APRNs make up the fastest-growing segment of the primary care professional workforce in the United States and could significantly increase the primary care professional workforce that would be available to practice in underserved areas, lower-income areas, and districts with lower scores on the high school proficiency assessments; and

S. R. 188
-1-
WHEREAS, licensed APRNs in Georgia are nationally certified to practice in family medicine, pediatrics, geriatrics, mental health, women's health, and midwifery, with many new graduates every year and more than 11,300 APRNs licensed in Georgia as of September, 2016; and

WHEREAS, in Georgia there are 79 counties that have no OB/GYN physicians, 63 counties have no pediatricians, 31 counties have no internal medicine physicians, and six counties have no family physicians, and APRNs have many overlapping skills sets with the physician providers for which there is a shortage most pronounced in rural Georgia.
