

The House Committee on Special Rules offers the following substitute to HR 1093:

A RESOLUTION

1 Creating the House Study Committee on Mental Illness Initiative, Reform, Public Health,
2 and Safety; and for other purposes.

3 WHEREAS, mental illness affects the emotional and behavioral well-being of individuals
4 and conditions and disorders can include depression, bipolar disorder, anxiety disorder, and
5 schizophrenia; and

6 WHEREAS, one in five adults experiences mental illness in some form in any given year.
7 Data indicate that at least 1.4 million adults in Georgia have some form of mental illness; and

8 WHEREAS, the National Alliance on Mental Illness reports that Georgia has close
9 to 349,000 adults and about 111,000 children living with serious mental health conditions;
10 and

11 WHEREAS, the Georgia Department of Corrections indicates that one in six prisoners has
12 been diagnosed with a mental illness; and

13 WHEREAS, Mental Health America (MHA), formerly the National Mental Health
14 Association, indicates the following:

15 (A) Georgia ranks twenty-ninth for adults with any mental illness with a total
16 of 1,360,000;

17 (B) Georgia ranks near the bottom in spending among state mental health agencies, at
18 a rate of \$59.00 per capita in fiscal 2013;

19 (C) Georgia ranks thirty-seventh for uninsured adults (313,000) with any mental illness;

20 (D) Georgia ranks last in the availability of mental health professionals with 1 for every
21 1,440 people; and

22 WHEREAS, local counties are able to implement accountability courts through the Georgia
23 Council on Criminal Justice Reform resulting in mental health courts; and

24 WHEREAS, in 2015, data compiled by the Georgia Sheriffs' Association indicate that in 73
25 of 159 counties, law enforcement officials traveled nearly 2 million miles and spent more
26 than 12,000 hours transporting mental health patients. This impedes law enforcement's
27 availability to respond elsewhere within communities they serve; and

28 WHEREAS, the closing of mental hospitals has added to the increase of mentally ill adults
29 housed in the local and county jails. Coupled with the decrease in state psychiatric hospital
30 beds, this has forced law enforcement to maintain and treat mentally ill adults in the jails,
31 rather than specialized facilities; and

32 WHEREAS, research indicates that when mental illness is treated appropriately with
33 medication and supervision, patients can lead productive lives; and

34 WHEREAS, a study of initiatives, reforms, public health, and safety concerning mentally ill
35 individuals in this state needs to be undertaken, including, but not limited to, a consideration
36 of efforts in treating and supporting mentally ill individuals, community based housing,
37 residential mental health facilities, and examining county and municipality infrastructures
38 inclusive of residential and congregate care housing options.
